VIRGO PLUS®
WELDING AND CUTTING EQUIPMENT

Product description:

- Advanced IGBT inverter technology, high working frequency, high working efficiency and energy saving.
- With good protection of under voltage, over voltage and over current, it makes machine safe and reliable
- Industrial type, heavy duty; easy moving.
- Exact digital current preset, it makes machine be easy operated.
- High frequency and high pressure arc striking, 100% arc starting.
- Advanced air flow control system, it has a save of 30% air compare to traditional machine, which prolongs the using life of air compressor.
- With self-lock working mode, it reduces the working intensity greatly.
- With tri-proof design, it ensures working stable and reliable when in kinds of adverse circumstances.
- Can be used for carbon steel , stainless steel, galvanised steel, copper, aluminum and other metal sheet cutting

Main technical parameters:

	CUT 80
Phase	3PH
Input voltage	AC 415V*3P±10%
Rated input capacity	12 KVA
Rated duty cycle	60%
Frequency (Hz)	50/60
Cutting current adjustment range	21-80A
No-load voltage (V)	320 V
Rated load voltage	110 V
Efficiency factor	0.95
Cutting torch using air pressure	0.45
Maximum cutting thickness	15
Cutting gas flow	250
Maximum cutting thickness	15mm
Arc starting	Non Touch
Shell protection grade	IP21S
Weight (kg)	21.5
Dimensions (mm)	530X260X470
